

Sample Query Output: -

1. Find customer detail who has selected the vehicle and approved the payment

Query:- select * from CustomerData

where email = (select email

from reservation as R,approval as A

where R.transactionId = A.transactionId and A.isApproved=true);

transactionId	modelName	totalPrice	time	modeOfPayment	email	transactionId	isApproved
1234555	city	8	2011-01-01 10:10:01	finance	xyz@gmail.com	1234555	1

email	phoneNumber	name	gender	dob	licenseNumber	PANNumber
xyz@gmail.com	9847493030	rcar	m	2000-07-13	alsdoinef	aenfiarf
NULL	NULL	NULL	NULL	NULL	NULL	NULL

2. Find vehicle detail selected by customer and approved the payment

Query : - select * from modelspecification

where modelName = (select modelName

from reservation as R,approval as A

where R.transactionId = A.transactionId and A.isApproved=true);

modelName	rating	basePrice	hp	mileage	descriptions
city	3.8	8	35	10	very good peak up and ground clearance
NULL	NULL	NULL	NULL	NULL	NULL

3. Find location company available and its sell with year

Query: - select *

from ShowRoomLocations

where companyName = 'bajaj';

Result Grid  Filter Rows: <input type="text"/>				
	companyName	pinCode	sell	year
▶	bajaj	23189	4	2002
	bajaj	23476	10	2002
	bajaj	34423	12	2002
*	NULL	NULL	NULL	NULL

4. Find model name, where it present and its quantity if color and Number of wheels given

Query: -

```
select * from ModelColors as A,modelType as B
```

```
where A.color='green' and B.fourWheeler = true and A.modelName=B.modelName;
```

Result Grid  Filter Rows: <input type="text"/> Export:  Wrap Cell Content: 												
	modelName	color	pinCode	quantity	modelName	patrol	diesel	electric	twoWheeler	threeWheeler	fourWheeler	heavyDeuty
▶	nano	green	23476	1	nano	1	0	1	0	0	1	0
